PROFESSIONAL SUMMARY

Results-driven Data Engineer with 4+ years of experience designing and delivering scalable ETL/ELT pipelines, cloud-native data solutions, and real-time data architectures. Proven expertise in AWS (EC2, S3, Lambda, Glue), Azure (Data Factory, Functions), Databricks, Apache Spark, PySpark, and SQL. Adept at reducing infrastructure costs, accelerating pipeline performance, and collaborating cross-functionally with data scientists and business stakeholders to drive data-informed decisions.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, Lambda, Glue), Azure (Data Factory, Functions), Databricks

Programming Languages: Python (Pandas, NumPy, PySpark), SQL, SparkSQL

Data Engineering Tools: Apache Spark, PySpark, Apache Airflow, CI/CD (GitHub Actions), REST APIs, WebSocket APIs

Databases: MySQL, AWS Redshift, Azure SQL Server, Data Warehouse design

Frameworks & Libraries: Django Rest Framework, Celery, Redis, Django Channels, Grafana

AI & LLM: Large Language Models (LLMs), Generative AI, Prompt Engineering, LangChain, OpenAI API, RAG

PROFESSIONAL EXPERIENCE

Data Engineer | NamaSYS

July 2022 – Present

- Architected and implemented 50+ ETL/ELT pipelines to ingest and transform enterprise-scale data (100M+ records/month) into the Data Warehouse, improving data availability and reporting reliability.
- Executed 100+ unit and integration tests to validate pipeline accuracy, increasing data reliability by 30%.
- Managed cloud infrastructure across 10+ AWS and Azure services, reducing data storage costs by 20% through optimized configurations and resource management.
- Developed cloud-native data pipelines using AWS EC2, S3, and Lambda, achieving 50% faster processing times for daily data loads.
- Automated deployment of Azure Functions using GitHub Actions and custom CI/CD pipelines, reducing deployment time by 70% through efficient scripting and workflow automation.
- Designed and optimized 5+ PySpark scripts and SparkSQL queries in Databricks to process 5M+ records; leveraged Spark UI to monitor and fine-tune job performance, improving pipeline execution efficiency by 40%.
- Collaborated with data engineers, data scientists, and business analysts to streamline data workflows and deliver actionable insights.

Python Developer | Elite Technocrats, Surat

June 2021 – July 2022

- Built 10+ Python scripts for strategy backtesting, trade execution, and technical indicator analysis, processing millions of data points daily.
- Developed 25+ REST and WebSocket APIs using Django Rest Framework, Channels, Redis, and Celery, enabling real-time trading features and event-driven architectures.
- Engineered and optimized high-frequency trading scripts, reducing latency by 60% and doubling transaction throughput using Python async I/O and multiprocessing techniques.
- Integrated 5+ third-party APIs, enhancing algorithmic bot intelligence and ensuring 99.9% real-time data accuracy and execution reliability.

Data Analyst Intern | TAS India Pvt Ltd, Pune

January 2020 – July 2020

- Managed time-series datasets and developed real-time Grafana dashboards for dynamic data visualization.
- Created predictive models using deep learning algorithms to forecast trends and support data-driven decision-making.

EDUCATION

Master of Technology (M.Tech) – Data Science and Analytics

2018 – 2020

Bachelor of Engineering (B.E) – Information Technology

2014 – 2018

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Databricks Generative AI Fundamentals
